Notes

Preface

**Chapter 1. Food: The Weak Link**

7. USDA, op. cit. note 1.

8. Ibid.

10. Figure 1–1 from FAO, op. cit. note 1; food expenditures from USDA, “Table 7: Food Expenditures by Families and Individuals as a Share of Disposable Personal Income,” at www.ers.usda.gov/briefing/cpifoodandexpenditures/data/expenditures_tables/table7.htm, updated 13 July 2011, from International Food Policy Research Institute (IFPRI),

11. FAO, op. cit. note 2, pp. 44–47.

17. U.N. Population Division, op. cit. note 5.

26. Intergovernmental Panel on Climate Change (IPCC), Climate Change 2007: The Physical Science Basis. Contribution of

Chapter 2. The Ecology of Population Growth

Notes

12. U.N. Population Division, op. cit. note 1; population stability defined by a rate of natural increase of -0.4 to 0.4 percent, using data from Population Reference Bureau, *2011 World Population Data Sheet* (Washington, DC: 2011).

20. U.N. Population Division, op. cit. note 1; Fund for Peace and Foreign Policy, op. cit. note 19.

Chapter 3. Moving Up the Food Chain

6. FAO, State of Food and Agriculture 2009, op. cit. note 4, pp. 11–12; FAO, op. cit. note 5.

8. Figure 3–2 data from USDA, Production, Supply and Distribution, electronic database, at www.fas.usda.gov/psdonline, updated 12 June 2012.

13. FAO, op. cit. note 5; FAO, op. cit. note 1; U.N. Population Division, op. cit. note 1.

15. Figure 3–3 data and aquaculture production from FAO, op. cit. note 1; early estimates from Earth Policy Institute based on growth rates in FAO, op. cit. note 5, and in FAO, op. cit. note 1.

18. USDA, op. cit. note 8; U.N. Population Division, op. cit. note 1.

20. FAO, op. cit. note 5.

21. FAO, op. cit. note 5; FAO, op. cit. note 1.

23. Conversion ratio of grain to beef based on Baker, op. cit. note 7, on Bailey, op. cit. note 7, and on data taken from various issues of Feedstuffs; pork conversion ratio from Leland Southard, Livestock and Poultry Situation and Outlook staff, USDA, ERS, discussion with author, 27 April 1992; eggs calculated from David Harvey, USDA, ERS, discussion with J. Matthew Roney, 9 July 2012; poultry derived from data in Bishop et al., op. cit. note 7; catfish and carp based on Naylor et al., op. cit. note 16.

25. USDA, op. cit. note 8; Jack Cook, An Introduction to Hog Feeding Spreads (Chicago: Chicago Mercantile Exchange, 2009), p. 3.

27. Meat producers from FAO, op. cit. note 5; soy use for feed from USDA, op. cit. note 8.

28. FAO, op. cit. note 5.

31. Dhall and Dhall, op. cit. note 29; Banerjee, op. cit. note 29.

32. John Wade, Adam Branson, and Xiang Qing, China Grain and Feed Annual Report 2002 (Beijing: USDA, March 2002);

34. S. F. Li, “Aquaculture Research and Its Relation to Development in China,” in World Fish Center, Agricultural Development and the Opportunities for Aquatic Resources Research in China (Penang, Malaysia: 2001); FAO, op. cit. note 1.

39. USDA, op. cit. note 8.

Chapter 4. Food or Fuel?

5. Figure 4–1 from USDA, Production, Supply, and Distribution, electronic database, at www.fas.usda.gov/psdonline, updated 12 June 2012; USDA, op. cit. note 2.

6. IMF, op. cit. note 3; Chicago Board of Trade, op. cit. note 3.

7. Grain required to fill an SUV tank calculated from corn to ethanol conversion from RFA, op. cit. note 3, and minimum consumption level for survival from World Food Programme (WFP) and United Nations High Commissioner for Refugees, WFP/UNHCR Guidelines for Estimating Food and Nutritional Needs in Emergencies (Rome: 1997); potential ethanol production from entire U.S. grain harvest calculated using data from USDA, op. cit. note 5; U.S. gasoline consumption from DOE, EIA, Annual Energy Outlook 2012 Early Release (Washington, DC: February 2012), and from energy conversion factor from Oak Ridge National Laboratory, “Bioenergy Conversion Factors,” at bioenergy.ornl.gov/papers/misc/energy_conv.html, viewed 12 June 2012; number of people who could be fed calculated from USDA, op. cit. note 2, and

14. Yields per acre from FAO, op. cit. note 13, p. 16.

15. Net energy ratios from Connor and Hernandez, op. cit. note 13, p. 70.

16. Ibid.; gallons per acre from FAO, op. cit. note 13, p. 16.

20. Doug Koplow, *A Boon to Bad Biofuels: Federal Tax Credits and Mandates Underwrite Environmental Damage at*
Notes

27. Pedro Alvarez et al., Fundamentals of a Sustainable U.S. Biofuels Policy, research paper (Houston, TX: James A. Baker III Institute for Public Policy, Rice University, 2010); National Research Council, op. cit. note 26.

Notes

Chapter 5. Eroding Soils Darkening Our Future

2. Lowdermilk, op. cit. note 1, p. 10.

3. One third is author’s estimate.

5. U.N. Food and Agriculture Organization (FAO), FAOSTAT, electronic database, at faostat.fao.org, updated 23 February 2012.

17. Ibid.

24. Ibid.

26. U.N. Population Division, op. cit. note 25; Figure 5–1 from FAO, op. cit. note 5.

28. FAO, op. cit. note 5.

29. Ibid.

39. USDA, op. cit. note 11.

Chapter 6. Peak Water and Food Scarcity

Notes

22. USDA, op. cit. note 11; U.N. Population Division, op. cit. note 5.

24. Figure of 130 million is author’s estimate, based on World Bank, China: Agenda for Water Sector Strategy for North China (Washington, DC: April 2001), pp. vii, xi; U.N. Population Division, op. cit. note 5; USDA, op. cit. note 11; Ma, op. cit. note 8.

25. Ma, op. cit. note 8.

29. Pearce, op. cit. note 27; Sengupta, op. cit. note 27.

37. USDA, op. cit. note 11; U.N. Population Division, op. cit. note 5.

38. Ibid.

48. Water to grain ratio from FAO, op. cit. note 1.

Chapter 7. Grain Yields Starting to Plateau
2. Ibid.

4. USDA, with 1950 from Worldwatch Institute, op. cit. note 1; USDA, op. cit. note 1; USDA, National Agricultural Statistics Service (NASS), *Quick Stats 2.0*, electronic database, at quickstats.nass.usda.gov, downloaded 24 May 2012.

20. Lobell, Cassman, and Field, op. cit. note 5.

28. USDA, op. cit. note 1; Brown, op. cit. note 3, pp. 13–16.

29. Worldwatch Institute, op. cit. note 1; USDA, op. cit. note 1.

32. USDA, op. cit. note 1.
33. Figure 7–1 data from FAO, op. cit. note 8.
35. USDA, op. cit. note 1.
36. Figure 7–2 data from ibid.
38. FAO, op. cit. note 8.
39. USDA, op. cit. note 1.

Chapter 8. Rising Temperature, Rising Food Prices

3. Figure 8–1 from National Aeronautics and Space Administration (NASA), Goddard Institute for Space Studies (GISS), “Global Land-Ocean Temperature Index in 0.01 Degrees Celsius,” at data.giss.nasa.gov/gistemp/tabledata/GLB.Ts+dSST.txt, updated May 2012; projections from James Hansen et al., “Global Surface Temperature Change,” Reviews of Geophysics, vol. 48, no. RG4004 (14 December 2010); IPCC, op. cit. note 1, pp. 237, 749; Cecilia Bitz, “Polar Amplification,” Real Climate, blog, at www.realclimate.org, 2 January 2006.

25. USDA, op. cit. note 12.

31. USDA, op. cit. note 12; U.N. Population Division, op. cit. note 16.

Chapter 9. China and the Soybean Challenge

5. Hymowitz and Shurtleff, op. cit. note 1.

6. USDA, op. cit. note 2; USDA, op. cit. note 4.

8. USDA, op. cit. note 4.

9. Ibid.

10. Ibid.

12. Figure 9–2 data from USDA, op. cit note 4.

15. USDA, op. cit. note 4.

16. Ibid.

17. Ibid.; U.N. Population Division, op. cit. note 14; “Biofuel Blending Targets and Production in Selected Countries,”
in Keith L. Kline et al., Biofuel Feedstock Assessment For Selected Countries (Oak Ridge, TN: Oak Ridge National Laboratory, February 2008).

18. USDA, op. cit. note 4.

27. Butler, op. cit. note 26; Rhett A. Butler, “Monitoring Deforestation: an Interview with Gilberto Camara, Head of Brazil’s Space Agency INPE,” Mongabay.com, 8 February 2011.

Chapter 10. The Global Land Rush

Notes

4. USDA, op. cit. note 3; Sungwoo Park, “South Korea to Expand Overseas Farming on Rising Food Costs,” Bloomberg, 9 July 2011.

5. USDA, op. cit. note 3.

8. GRAIN, op. cit. note 1; GRAIN, “About Us,” at www.grain.org/pages/about-us, viewed 29 May 2012; Joachim von Braun and Ruth Meinzen-Dick, “Land Grabbing” by Foreign Investors in Developing Countries, Policy Brief No. 13 (Washington, DC: International Food Policy Research Institute, April 2009); Shepard Daniel with Anuradha Mittal, The Great Land Grab: Rush for World’s Farmland Threatens Food Security for the Poor (Oakland, CA: Oakland Institute, 2009); World Bank, Rising Global Interest in Farmland: Can It Yield Sustainable and Equitable Benefits? (Washington, DC: September 2010), pp. 33–36; Klaus Deininger and Derek Byerlee, Rising Global Interest in Farmland: Can It Yield Sustainable and Equitable Benefits? (Washington, DC: World Bank, January 2011), pp. 49–53. Note: Another highly-anticipated effort to compile information on large-scale land acquisitions, called the Land Matrix, was launched in April 2012 (landportal.info/landmatrix). This was a joint effort by the International Land Coalition, Centre de Coopération Internationale en Recherche Agronomique pour le Développement, Centre for Development and Environment, German Institute for Global and Area Studies, and Deutsche Gesellschaft für Internationale Zusammenarbeit to make data and descriptions of verified foreign land deals more accessible to research organizations, academics, and the general public. While the project launch generated heavy media coverage, it soon became clear that the database had some of the same drawbacks as previous attempts. For example, certain large deals known for some time to have been cancelled were still listed. The Land Matrix is an ongoing effort, accepting user feedback and submissions of new land acquisition examples, so it may prove a valuable tool as it is improved.

10. Ibid., p. 51; USDA, op. cit. note 3.

Notes

Chapter 11. Can We Prevent a Food Breakdown?

2. U.N. Food and Agriculture Organization (FAO), “FAO Food

5. GlobeScan Inc., op. cit. note 2, p. 12.

8. For a detailed explanation of the climate stabilization goal, see Lester R. Brown, Plan B 4.0: Mobilizing to Save Civilization (New York: W. W. Norton & Company, 2009), available at www.earth-policy.org/books/pb4, as well as the book’s supporting datasets at www.earth-policy.org/books/pb4/pb4_data.
